To claudedavis2024@gmail.com <claudedavis2024@gmail.com>

GitHub is joining [Hack Club](#) for [Summer of Making 2025](#)!

**Code** this summer to earn incredible prizes: **Framework Laptops**, **Raspberry Pis**, **Cricut Cutters**, **Flipper Zeros**, **Bambu 3D Printers**, and so much more.

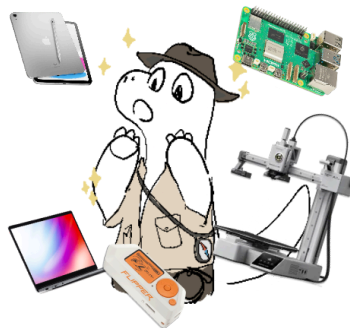

Here's how it works:

1. Code on personal projects to earn *shells*
2. Spend your shells on prizes from Pis to Pinecils
3. Repeat until August 31st

Sign Up & Get Free Stickers

*Open to teenagers 18 and under.*

*Age 19+? Earn the same prizes by [getting teens to sign up](#).*

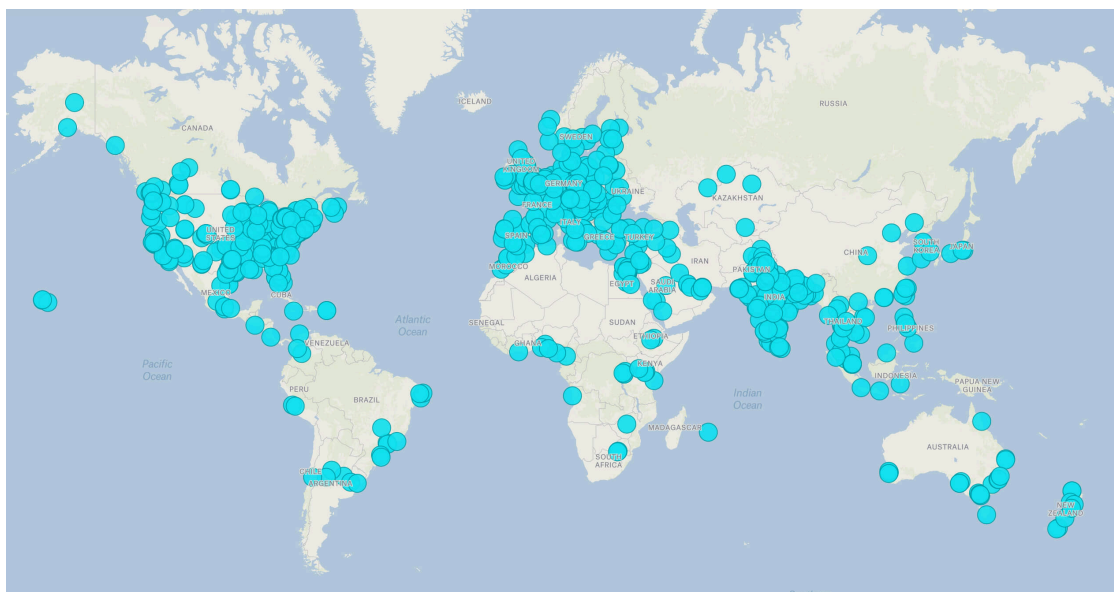

## Why Are We Doing This?

Because we love seeing teenagers build awesome projects 🤖

GitHub and Hack Club believe that the best way to grow as a maker is to build things you're proud of.

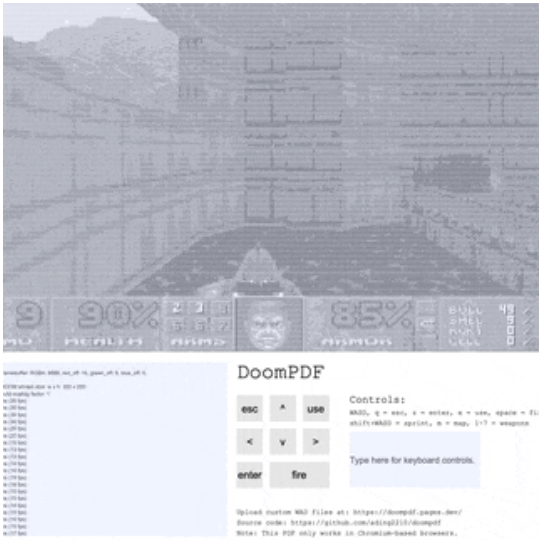

It's just like Hack Club High Seas and Hack Club Arcade where high schoolers shipped 9,214 projects and earned \$600,000 USD in prizes ( 🎮🎮🎮🎮 )

*5,400 people received at least 1 package in Hack Club High Seas this winter!*

**Age 19 or older? You can earn prizes too.**

Earn the same prizes by getting teens age 18 and under to sign up. [See our guide here.](#)

DoomPDF by @ading2210 for High Seas

@tobyab, 16 y/o Hack Clubber, interviewed  
by UK Prime Minister.

We can't wait to see what you make this summer!
